INDEX

Accessory "B" factor, further evidence for a third (Reader) 77
Acid-base balance of cattle urine, influence of foodstuffs on (Warth and Ayyar) 1595
Acidosis, lactic, in avitaminosis B, brain localisation of, and relation of, to symptoms (Kinnersley and Peters) 711
Acids, fatty, of butter, variations in, due to changes in seasonal and feeding conditions (Hilditch and Sleightholme) 1098
Acids, fatty, of glycerides of fish-liver oils (Guha, Hilditch and Lovern) 266
ADAIR, G. S. and ROBINSON, M. E. The specific refraction increments of serum-albumin and serum-globulin 993
ADAIR, G. S. and ROBINSON, M. E. The analysis of the osmotic pressures of the serum proteins and the molecular weights of albumins and globulins 1864
AHMAD, B. Observations on a diatom (*Nitzschia closterium* W. Sm.) as a source of vitamin A 860
AHMAD, B. and DRUMMOND, J. C. The relative vitamin A value of the body and liver oils of certain fish 27
Air, expired, human, traces of combustible gases in (Parsons) 585
AITKEN, H. A. A. Sulphur in organic and inorganic combination in pasture grasses 250
AITKEN, H. A. A. An improved method for the determination of iodine in blood 1456
Albumin, egg, titration of basic and acidic groups in (Booth) 158
Albumins, molecular weights of (Adair and Robinson) 1864
Alcohol, denaturation of proteins in presence of (Booth) 1699
Algae, organic matter given off by (Krogh and Lange) 1666
Alkaloids, action of some, in bird malaria (Goodson, Henry and Macfie) 874
ALLAN, H., *see* DODDS, E. C.
Alopoecia vulpes, composition of fatty acids of glycerides of liver oil of (Lovern) 866
Aluminium, biochemistry of (Mackenzie) 1433
Amino-acids, as zwitterions (Birch and Harris) 1080
Amino-acids, basic, of proteins, precipitation of, with phosphotungstic acid (Thimann) 368
Amino-acids of tissues (Rosedale and Morris) 1294; (Rosedale and Oliveiro) 1297
Amino-acids, zwitterion constitution of, proved (Harris) 1080
Amino-nitrogen, improved design of the Van Slyke apparatus for the determination of 961
Ammonia, production of, by surviving kidney tissue (Holmes and Patey) 1564
Ammonia, urinary, studies on the possible precursors of (Holmes and Patey) 1564
Ampholytes, non-zwitterion, instances of (Birch and Harris) 1080
Apples, antiscorbutic potency of (Bracewell, Hoyle and Zilva) 82
Arginine and vitamin B content of diets, correlation between (Gilroy) 1659
Arginine, dissociation constants of (Birch and Harris) 564
Arginine, effect of, on growth-rate of transplantable tumour of mouse (Gilroy) 589, 1181
Arginine, rate of liberation of, in tryptic digestion (Dauphinee and Hunter) 1128
Arginine, zwitterion constitution of (Birch and Harris) 564
Arsenate, action of, on hexosephosphatase (Macfarlane) 1051
Arsenite, action of, on tissue respiration (Szent-Györgyi) 1723
ANDERSON, I. A. and MACLEOD, J. J. R. The glycogen of mammalian muscle and its behaviour after death 1408
Anthocyanin pigments, the natural (Scott-Moncrieff) 753, 767
Antiglyoxalase (Giršavičius) 446
Antimony trichloride, reaction of, with cod-liver oil and its unsaponifiable fraction (Smith and Hazley) 1942
Antirrhinum majus, magenta flower pigment of (Scott-Moncrieff) 753
Antiscorbutic fraction of lemon juice (Zilva) 1687
Antiscorbutic potency of apples (Bracewell, Hoyle and Zilva) 82
Antiscorbutic vitamin in lemon juice, preservation of (Williams and Corran) 37
ASHBY, W. R. A cell for the measurement of the conductivity of the blood-serum 1557
ASHFORD, C. A. The phosphorus distribution in blood and the calcium and phosphorus excretion during hypervitaminosis D 661
ASHFORD, C. A., *see also* HOLMES, E. G.
Aspartic acid as precursor of succinic acid in muscle (Needham) 208
Avitaminosis B, lactic acidosis in, brain localisation of, and relation of, to symptoms (Kinnersley and Peters) 711
AYKROYD, W. R. The vitamin B_2 content of cereals and the supposed connection between human pellagra and deficiency of this vitamin 1479
AYYAR, N. K., *see* WARTH, F. J.

Bacillus coli communis, a comparison of the dehydrogenations produced by, in presence of oxygen and methylene blue (Cook) 1538
Bacillus tetani spores *in vitro*, positive limit of oxidation-reduction potential for germination of (Knight and Fildes) 1496

Bacteria, culture media for, method of poising oxidation-reduction potential of (Knight) 1075
Bacteria, gas production by, apparatus for measuring rate of (Cranston) 525
Bacterial growth, oxidation-reduction studies in relation to (Knight and Fildes) 1496
Bacterial growth phases and denitrification (Lloyd and Cranston) 529
Bacterial suspensions, oxidation of phenols and of dimethyl-*p*-phenylenediamine by (Happold) 1737
Barcroft apparatus, use of, for measurement of tissue respiration (Dixon and Elliott) 820
Barritt, J., King, A. T. and Pickard, J. N. The effects of cystine diet on chemical composition in rabbit wool 1061
Barton-Wright, E. C. and Pratt, M. C. Studies in photosynthesis. I. The formaldehyde hypothesis 1210
Barton-Wright, E. C. and Pratt, M. C. Studies in photosynthesis. II. The first sugar of carbon-assimilation and the nature of the carbohydrates in the narcissus leaf 1217
Basic substances, effect of p_H on precipitation of, by phosphotungstic acid (Peters) 1852
Batyl alcohol, surface films of (Knight) 257
Bile pigments in relation to Van den Bergh reaction (Griffiths and Kaye) 1400
Bile salts in normal blood, alleged presence of (Walker) 1489
"Bios," chemical investigation of (Narayanan) 6
Birch, T. W. and Harris, L. J. A redetermination of the titration dissociation constants of arginine and histidine and a demonstration of the zwitterion constitution of these molecules 564
Birch, T. W. and Harris, L. J. Zwitterions. II. Amino-acids, polypeptides etc. and proteins as zwitterions, with instances of non-zwitterion ampholytes 1080
Blagoveschenski, A. V. The enzymic synthesis of raffinose 1337
Blood, alleged presence of bile salts in normal (Walker) 1489
Blood-calcium, effects of cereal extracts on (Mirvish) 233
Blood, determination of iodine in (Aitken) 1456
Blood, human, non-reducing substances of (Herbert and Bourne) 299
Blood, non-sugar reducing substances of human, in pathological conditions (Herbert and Bourne) 1787
Blood, oxygen capacity of, in cases of mental disorder (Woodhouse and Pickworth) 834
Blood, pigeons', reducing substances of (Gulland and Peters) 91
Blood, presence of volatile organic chlorine compound in (Morris and Morris) 1716
Blood-serum, a cell for the measurement of the conductivity of (Ashby) 1557
Blood-serum, determination of total calcium in (Patterson) 355
Blood-serum or plasma, colorimetric and electrometric methods for determination of p_H of (Fosbinder and Schoonover) 1805
Blood-sugar, determination of (Tompsett) 1148, 1164
Blood-sugar, determination of, effect of different deproteinising agents upon (Tompsett) 1164
Blood-sugar, effect of glutathione on determination of (Herbert, Bourne and Groen) 291
Blood-sugar, nature of the (Winter) 851
Bond, M., *see* Widdows, S. T.
Bone, abnormal conditions of, notes on (Cuthbertson) 1245
Booth, J., *see* Campbell, W. G.
Booth, N. The denaturation of proteins. VI. The titration of the basic and acidic groups in egg-albumin 158
Booth, N. The denaturation of proteins. VII. Denaturation in the presence of alcohol 1699
Bourne, M. C., *see* Herbert, F. K.
Boyland, E. Phosphoric esters in alcoholic fermentation. II. Pyrophosphate in yeast preparations 350
Boyland, E. Phosphoric esters in alcoholic fermentation. III. The lag between phosphate esterification and carbon dioxide evolution. IV. Oxidation-reduction potentials of yeast preparations 703
Bracewell, M. F., Hoyle, E. and Zilva, S. S. The antiscorbutic potency of apples 82
Bradycardia as distinctive feature of vitamin B deficiency in the rat (Drury, Harris and Maudsley) 1632
Brain, lactic acid oxidation in (Holmes and Ashford) 1119
Brazier, M. A. B. A new method for the separation of the products of protein hydrolysis 1188
Breeding rats for work on vitamin A, diet for (Gudjónsson) 1591
Brooks, J. The effect of freezing in a concentrated solution of sodium chloride on the colour of red muscle 1379
Broth, meat, sterile, oxidation-reduction potential of (Knight) 1066
Butter, component fatty acids of, variations in, due to changes in seasonal and feeding conditions (Hilditch and Sleightholme) 1098
Butter, vitamin A of (Morton and Heilbron) 870

Calcification, possible significance of hexose-phosphoric esters in (Robison and Soames) 1922; (Robison, Macleod and Rosenheim) 1927
Calcium, blood, effect of cereal extracts on (Mirvish) 233
Calcium excretion during hypervitaminosis D (Ashford) 661
Calcium metabolism of rats receiving excessive doses of irradiated ergosterol (Watchorn) 631
Calcium, total, determination of, in blood-serum (Patterson) 355
Callow, E. H. The determination of sucrose by Hanes's modification of the Hagedorn and Jensen method 57
Campbell, W. G. The chemistry of the white rots of wood. I. The effect on wood substance of *Polystictus versicolor* (Linn.) Fr. 1235
Campbell, W. G. and Booth, J. The chemical aspect of the drying of timber 641

Cancer-producing substances (Kennaway) 497
Cancer-producing tars and oils and related substances, spectra of (Hieger) 505
CANNAN, R. K. and MUNTWYLER, E. The action of pepsin on gelatin 1012
CANNAN, R. K., *see also* CHIBNALL, A. C.
CAPPER, N. S. The alleged contamination of carotene by vitamin A 453
CAPPER, N. S. Carotene and vitamin A. The transformation of carotene into vitamin A as shown by a study of the absorption spectra of rat-liver oils 980
Carbohydrate-free diet, metabolism of animals on (Hynd and Rotter) 1390
Carbohydrates of the narcissus leaf (Barton-Wright and Pratt) 1217
Carotene, absence of liver-oil vitamin A from (Moore) 692
Carotene, alleged contamination of, by vitamin A (Capper) 453
Carotene, conversion of, to vitamin A *in vivo* (Moore) 692
Carotene, transformation of, into vitamin A, spectroscopic evidence for (Capper) 980
CARTER, C. W. Heart block in pigeons, curative factor 1811
CARTER, C. W., KINNERSLEY, H. W. and PETERS, R. A. Maintenance nutrition in the adult pigeon and its relation to torulin (vitamin B_1). I 1832
CARTER, C. W., KINNERSLEY, H. W. and PETERS, R. A. Maintenance nutrition in the adult pigeon. II 1844
Caseinogen, biological value of purified (Fixsen) 1794
Castration, effect of, on chemical composition of rats (Korenchevsky and Dennison) 954
C. diphtheriae, cultures of, oxidation-reduction potentials of (Hewitt) 669
Cellulose, determination of, in straws (Jenkins) 1428
Cereal extracts, effect of, on blood-calcium (Mirvish) 233
CHANDRASENA, J. P. C. The chemistry of the products of *Cocos nucifera* 1493
CHIBNALL, A. C. and CANNAN, R. K. Synthesis of the *i*-hydroxyasparagines. A note on their dissociation constants 945

Tryptic digestion, rate of liberation of arginine in (Dauphinee and Hunter) 1128
Tryptophan, colorimetric determination of, in protein hydrolysates (McFarlane and Fulmer) 1601
Tumour growth, avitaminosis B in relation to (Gilroy) 1384
Tumour growth, effect of thyroxine on (Gilroy) 1659
Tumour growth-rate in mouse, comparative effects of arginine and thyroxine on (Gilroy) 1181
Tumour, transplantable, of mouse, influence of arginine on growth rate of (Gilroy) 589
Turner, K. The fatty acids in the liver of the sheep 1327
Turner, K. and Watson, M. M. Sphingomyelin, phrenosin and kerasin in films one molecule thick on water 113
Tyrosinase, action of, on substances related to tyrosine (Dulière and Raper) 239
Tyrosinase, irradiation of *Dolichos* (Narayanamurti and Ramaswami) 1655
Tyrosinase, mode of action of (Pugh) 1442
Tyrosine, colorimetric determination of, in protein hydrolysates (McFarlane and Fulmer) 1601

Uricase and its action (Przylecki) 8; (Truszkowski) 1340, 1349, 1359
Urine, cattle, influence of foodstuffs on acid-base balance of (Warth and Ayyar) 1595
Urocarmine reaction, the (Fearon and Thompson) 1371

Van den Bergh reaction, bile pigments in relation to (Griffiths and Kaye) 1400
Vitamin A, absorption spectra in relation to (Morton, Heilbron and Spring) 136
Vitamin A, a diatom as source of (Ahmad) 860
Vitamin A, alleged contamination of carotene by (Capper) 453
Vitamin A, conversion of carotene to, *in vivo* (Moore) 692
Vitamin A, determination of (Coward, Key, Dyer and Morgan) 1952
Vitamin A, diet for breeding rats for work on (Gudjónsson) 1591
Vitamin A of butter (Morton and Heilbron) 870
Vitamin A, the liver oil, absence of, from carotene (Moore) 692
Vitamin A, transformation of carotene into, spectroscopic evidence for (Capper) 980
Vitamin A value, relative, of body and liver oils of fish (Ahmad and Drummond) 27
Vitamin, antiscorbutic, in lemon juice, preservation of (Williams and Corran) 37
Vitamin B complex, alcohol-solubility of vitamin B_2 constituent of (Chick and Copping) 1744
Vitamin B complex, distribution of (Roscoe) 1754

Vitamin B, composite nature of the water-soluble (Chick and Copping) 1764
Vitamin B content of diets and arginine, correlation between (Gilroy) 1659
Vitamin B content of grass seeds in relation to manures (Rowlands and Wilkinson) 199
Vitamin B deficiency in the rat, bradycardia as a distinctive feature of (Drury, Harris and Maudsley) 1632
Vitamin B_1 of yeast, comparison of curative activity of, upon adult pigeon and adult white rat (Kinnersley, Peters and Reader) 1820
Vitamin B_1 of yeast, relation of p_H to precipitation of, by phosphotungstic acid (Kinnersley and Peters) 1856
Vitamin B_1 of yeast, relation of, to maintenance nutrition in the pigeon (Carter, Kinnersley and Peters) 1832
Vitamin B_1, question of identity of a bacterial growth-promoting factor with (Davis and Golding) 1503
Vitamin B_2, alcohol-solubility of (Chick and Copping) 1744
Vitamin B_2 content of cereals (Aykroyd) 1479
Vitamin B_2, egg-white as source of (Chick Copping and Roscoe) 1748
Vitamin B_2, heat stability of (Chick and Roscoe) 105; (Chick and Copping) 932
Vitamin B_2, influence of, on determination of the biological value of purified caseinogen (Fixsen) 1794
Vitamin B_2, supposed connection between human pellagra and deficiency of (Aykroyd) 1479
Vitamin B_2, the concentration of (Narayanan and Drummond) 19
Vitamin B_4, assay of (Reader) 1827
Vitamin C and the rat's diet (Hartwell) 967
Vitamin of rice, antineuritic, curative activity of (Jansen, Kinnersley, Peters and Reader) 1824
Vitamins, fat-soluble, of milk (Crawford, Golding, Perry and Zilva) 682
Vitamins, *see also* Antiscorbutic and Accessory "B" factor
Volatile organic chlorine compound in blood, presence of (Morris and Morris) 1716
Volatile substances, determination of (Gazenko) 55

Walker, E. The alleged presence of bile salts in normal blood 1489
Wallis, R. L. M. Obituary notice of 578
Warth, F. J. and Ayyar, N. K. The influence of foodstuffs on the acid-base balance of cattle urine 1595
Watchorn, E. The absorption and excretion of calcium and phosphorus by rats receiving excessive doses of irradiated ergosterol 631
Watchorn, E. Irradiated ergosterol and calcium-free diet; effect on calcium and phosphorus metabolism 1560
Watson, M. M., *see* Turner, K.
Wheat bran, hemicelluloses of (Norris and Preece) 59
Whitehead, H. R. The reduction of methylene blue in milk. The influence of light 579
Widdows, S. T., Lowenfeld, M. F., Bond, M. and Taylor, E. I. A study of the composition of human milk in the later periods of lactation and a comparison with that of early milk 327
Wiley, W. J. The dissociation of calcium citrate 856
Wilkinson, B., *see* Rowlands, M. J.
Williams, J. and Corran, J. W. The preservation of the antiscorbutic vitamin in lemon juice 37
Winter, L. B. The nature of the blood-sugar 851
Wood, T. B. Obituary notice of 1
Wood substance, effect of *Polystictus versicolor* on (Campbell) 1235
Wood, white rots of, chemistry of (Campbell) 1235
Woodhouse, D. L. and Pickworth, F. A. The oxygen capacity of the blood in one hundred cases of mental disorder 834
Wool, rabbit, effect of cystine diet on composition of (Barritt, King and Pickard) 1061
Wool, sulphur linkage in (Rimington) 205
Woolf, B., *see* Mann, P. J. G.

Xanthine oxidase in the avian embryo (Morgan) 410

Yeager, J. F., *see* Ponder, E.
Yeast, behaviour of glutathione in (Meldrum) 1421
Yeast preparations, fermentation by (Harden and Macfarlane) 343
Yeast preparations, oxidation-reduction potentials of (Boyland) 703
Yeast preparations, pyrophosphate in (Boyland) 350

Zilva, S. S. The antiscorbutic fraction of lemon juice. IX 1687
Zilva, S. S., *see also* Bracewell, M. F. and Crawford, M. E. F.
Zwitterions, amino-acids, polypeptides and proteins as (Birch and Harris) 1080
Zwitterion constitution of arginine and histidine (Birch and Harris) 564

CAMBRIDGE: PRINTED BY W. LEWIS, M.A., AT THE UNIVERSITY PRESS
